WHY I WANT TO BE HERE

My ultimate goal is to integrate myself into a team of creative and positive teammates! I'm hungry to learn and grow as I begin my next chapter in life as a web developer. Changing career paths from sales and team management to web development has been a fun and fantastic challenge. I've grown so much during this time and now I'm ready to push myself to the next level. I look forward to joining a team that will go the extra mile for clients and provide innovative custom solutions that look great and feel amazing. I feel innovative and being different creates a fun and forward thinking work environment and that results in powerful synergy. I believe this opportunity would be great for me to dive in and share my energy and excitement for creating with an already great group of developers.

HOW I CAN ADD VALUE

I possess the natural ability to mix with all types of personalities and create a positive atmosphere. I've worked in many different industries and with many different types of people. This has been a great gift because I feel I can be successful in any environment. I enjoy Collaborating and communicating. I've built and managed teams. I thrive in high pressure situations. I'm always positive and looking to help in any way I can. As a junior developer experience comes last but my easy going coachable personality makes me a great addition to a new team.

JavaScript | ES6 | React | HTML | CSS | Node.js | Express | AJAX/HTTP | Mongoose | MongoDB | JSON | Git

WHAT I'VE LEARNED

- **Web Development Certification**
V School
2021-2022
